

Collect and Calculate Impact!

The best part of *Truck or Treat* is empowering kids to fight hunger in New York City. Nothing is more rewarding than helping our neighbors in need through this campaign. Help your kids track and tally how many New Yorkers they have helped by collecting and calculating donations as they come in.

Step 1: Choose a box.

Pick a box size that suits your classroom and cut a slot at the top to slide donations into.

Step 2: Get down to decorating!

Decorate your collection box for the classroom. You can use construction paper, crayons, markers, stickers or any of the images on the next page to decorate your boxes.

Step 4: Put all your trucks in a row.

Print a few pages of the white Tracker Truck from the Digital Toolkit on 11x17 paper and cut them into single pieces. You may want to laminate them should you be able to. These will help you track how much money has come in and how many people it helps.

Step 5: Collect and count!

For every donation that comes in, record the number on the box. Multiply this number by four. Every \$1 helps City Harvest rescue and deliver enough food for 4 people.
